PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering graduate (2026) with hands-on professional experience as a Web Application Developer, currently building e-commerce platforms and managing online marketplace accounts (Meesho, Amazon) at KN Enterprises. Skilled in Flutter, Dart, Node.js, REST API integration, Firebase, and full stack web development. Strong understanding of computer networking fundamentals, client-server architecture, and software engineering practices. Proven ability to manage cross-functional responsibilities, coordinate with business teams, and deliver production-ready web and mobile applications. Quick learner with strong analytical, problem-solving, and interpersonal skills.

WORK EXPERIENCE

Web Application Developer Present

KN Enterprises | Onsite

- Designing and developing a fully functional e-commerce shopping website to enable online product listings, cart management, order processing, and customer management for the business.
- Managing and operating the company's official Meesho seller account — handling product listings, inventory updates, order fulfillment, pricing strategy, and customer queries to drive online sales.
- Managing the company's Amazon seller account — overseeing product catalogue management, account health monitoring, promotional campaigns, and ensuring compliance with Amazon's seller policies.
- Handling end-to-end online business operations including digital product management, online order tracking, and coordinating between warehouse and delivery workflows.
- Building and maintaining the company's web presence with a focus on performance, mobile responsiveness, and user experience to maximize customer conversion.

Flutter Developer Intern August 2025 – November 2025

TerraBiz Tech Pvt Ltd | Remote

- Collaborated with cross-functional development and QA teams to understand business requirements, plan application architecture, and execute delivery within defined timelines.
- Conducted capacity planning for UI components and data flow, ensuring the application could scale to meet growing user demands without performance degradation.
- Integrated RESTful API endpoints and managed structured data flow between UI and backend services, demonstrating understanding of client-server architecture and networking principles.
- Generated engineering documentation per module and maintained monthly operating plans for feature releases and deployments on the Google Play Store app Ophiz.
- Enhanced technical knowledge by attending internal technical seminars and webinars on mobile and backend technologies.

Web Developer Intern June 2024 – July 2024

Excellence Group of Institute | Onsite, Ludhiana, Punjab

- Understood business and functional requirements from stakeholders and translated them into technical designs for 3 fully responsive web applications.
- Implemented dynamic front-end and back-end features using HTML5, CSS3, JavaScript, and Node.js, reducing bounce rates by 15% and increasing user engagement by 40%.
- Coordinated with team members to adhere to standard operating processes and best practices, ensuring timely delivery.

PROJECTS

TellMe – Anonymous Real-Time Chat Website | React, Node.js, WebSocket, Vercel 2026

Live: https://tellme-frontend.vercel.app/dashboard

- Built and deployed a fully anonymous real-time chat web platform where any user can join and chat instantly — no registration or login required, ensuring complete user privacy.
- Implemented a privacy-first auto-delete architecture: all messages and session data are permanently and automatically erased after each conversation ends — zero chat history stored on server or client.
- Engineered real-time bi-directional communication using WebSocket protocol, enabling sub-second message delivery across all connected anonymous users simultaneously.
- Deployed full-stack web application on Vercel with optimized build pipeline, achieving high availability and fast global load times with a frictionless, minimal UI.

TellMe – Real-Time Chat Mobile Application | Flutter, Firebase, Dart, Provider 2025

- Built a separate and distinct cross-platform mobile chat application using Flutter and Dart — unlike the website, the app saves full chat history per authenticated user account.
- Integrated Firebase Authentication, Cloud Firestore for persistent message history, and Firebase Cloud Messaging (FCM) for push notifications on Android and iOS.
- Implemented real-time one-to-one messaging, typing indicators, image sharing, and push notifications. Achieved zero crash rate across 50+ active users with sync latency under 1 second.

KOSHIS – College Event Management App | Flutter, Firebase, Provider 2024

- Developed a cross-platform mobile application for college event management, user registration, real-time notifications, and announcements using Flutter and Firebase.
- Adopted by 200+ students during campus events, improving participation and reducing manual coordination by 60% through efficient digital workflow design.
- Applied Provider-based state management for smooth navigation, consistent UI state, and improved responsiveness across screen sizes.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering August 2022 – May 2026

PCTE Group of Institutes | Ludhiana, Punjab

Relevant Coursework: Computer Networks, Data Communication, Operating Systems, Database Management Systems, Software Engineering, Data Structures and Algorithms, Object-Oriented Programming

TECHNICAL SKILLS

Networking & Communication: Computer Networking Fundamentals, Client-Server Architecture, REST API, HTTP/HTTPS, TCP/IP, WebSocket, Firebase Cloud Messaging, Data Communication

E-Commerce & Platforms: Meesho Seller Management, Amazon Seller Central, Product Catalogue Management, Online Order Management, E-Commerce Web Development

Mobile Development: Flutter, Dart, Android, iOS, Cross-Platform Development, BLoC, Provider, State Management

Frontend Development: HTML5, CSS3, JavaScript, React, Responsive Web Design, Material Design

Backend Development: Node.js, Express.js, RESTful API Development

Database & Cloud: Firebase, Cloud Firestore, MongoDB, PostgreSQL

Programming Languages: Dart, JavaScript, Python, C, C++

Version Control & Tools: Git, GitHub, Android Studio, VS Code, Postman, Vercel, Firebase Console

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Cross-Functional Coordination, Interpersonal Communication, Fast Learner

ACHIEVEMENTS AND AWARDS

First Place – Hackathon PCTE Group of Institutes, Ludhiana

- Developed a civic issue-reporting web application with real-time complaint submission, image upload, GPS location tagging, and status tracking — won 1st position for innovation, UI/UX, and real-world problem-solving.

Top 10% – Finance Case Study Competition DTU BizIgnite, Delhi Technological University

- Collaborated in a team of 2 to analyze a real-world finance case and present structured solutions to industry experts — ranked in top 10% among 100+ participating teams.
