PROFESSIONAL SUMMARY

Flutter Developer and Full Stack Developer with 1+ years of hands-on experience designing, developing, and deploying cross-platform mobile applications using Flutter and Dart. Skilled in full stack web development with Node.js, Express.js, HTML, CSS, and JavaScript. Proficient in state management using BLoC and Provider, REST API integration, Firebase, and MongoDB. Experienced in building production-ready Android and iOS applications with clean architecture and optimized performance. Strong understanding of software development life cycle (SDLC), version control with Git and GitHub, and Agile workflows. Passionate about delivering high-quality, scalable, and user-friendly mobile and web solutions.

WORK EXPERIENCE

Flutter Developer Intern August 2025 – November 2025

TerraBiz Tech Pvt Ltd | Remote

- Developed and maintained Ophiz, a production Flutter mobile application available on the Google Play Store, using Flutter, Dart, and BLoC architecture for scalable state management.
- Designed and implemented responsive UI components adhering to Material Design guidelines, improving app stability and reducing crash rate by optimizing widget rendering and memory usage.
- Integrated RESTful API endpoints and managed structured data flow between the UI layer and backend services, enabling seamless real-time user experiences.
- Collaborated with the development team using Git and GitHub for version control, code reviews, and maintaining clean, modular codebases following best practices.
- Enhanced app performance through widget-level optimization, lazy loading, and efficient state handling, resulting in improved load times and smoother navigation.

Web Developer Intern June 2024 – July 2024

Excellence Group of Institute | Onsite, Ludhiana, Punjab

- Designed and developed 3 fully responsive websites using HTML5, CSS3, JavaScript, and Node.js, improving cross-device user experience and reducing bounce rate by 15%.
- Implemented dynamic, interactive front-end features using JavaScript and integrated backend logic with Node.js and Express.js, increasing user engagement by 40%.
- Improved overall website functionality and user satisfaction metrics by 35% through performance optimization and UX enhancements.

PROJECTS

TellMe – Real-Time Chat Application | Flutter, Firebase, Dart, Provider 2024

- Built a fully functional cross-platform real-time messaging application using Flutter and Dart, integrated with Firebase Authentication, Cloud Firestore, and Firebase Cloud Messaging (FCM).
- Implemented core features including real-time one-to-one messaging, typing indicators, image sharing, and push notifications for Android and iOS platforms.
- Utilized Provider for efficient state management, ensuring smooth navigation, reactive UI updates, and optimized app performance.
- Achieved zero crash rate across 50+ active users with real-time data sync latency under 1 second, demonstrating production-level reliability.
- Designed responsive and accessible UI/UX with clean Material Design components ensuring consistent experience across screen sizes.

KOSHIS – College Event Management App | Flutter, Firebase, Dart, Provider 2024

- Developed a cross-platform mobile application for college event management, user registration, announcements, and real-time notifications using Flutter and Firebase.
- Implemented event listing, real-time push notifications, user authentication, and event reminders, streamlining campus communication and coordination.
- Applied Provider-based state management for smooth screen transitions, consistent UI state, and improved responsiveness across devices.
- App adopted by 200+ students during campus events, increasing event participation and reducing manual coordination effort by 60%.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android, iOS, Cross-Platform Development, BLoC, Provider, State Management
Frontend Development: HTML5, CSS3, JavaScript, Responsive Web Design, Material Design
Backend Development: Node.js, Express.js, REST API Development, RESTful Services
Database: Firebase, Cloud Firestore, MongoDB, PostgreSQL
Programming Languages: Dart, JavaScript, Python, C, C++
Version Control: Git, GitHub, Code Review, Collaborative Development
Tools & Platforms: Android Studio, VS Code, Postman, Firebase Console, Google Play Store
Soft Skills: Communication, Leadership, Team Collaboration, Problem Solving, Fast Learner

EDUCATION

Bachelor of Technology in Computer Science and Engineering August 2022 – May 2026
PCTE Group of Institutes | Ludhiana, Punjab

ACHIEVEMENTS AND AWARDS

First Place – Hackathon PCTE Group of Institutes, Ludhiana
- Developed a civic issue-reporting web application enabling citizens to report potholes, damaged roads, street light faults, and garbage issues with real-time complaint submission, image upload, location tagging, and status tracking.
- Secured 1st position among multiple competing teams, recognized for innovation, UI/UX design quality, and real-world problem-solving impact.

Top 10% – Finance Case Study Competition DTU BizIgnite, Delhi Technological University
- Collaborated in a team of 2 to analyze a real-world finance case study and present structured solutions to industry experts and panel judges.
- Achieved top 10% ranking among 100+ participating teams, demonstrating analytical thinking, financial problem-solving, and effective communication.
